KOKOSFLORA TECHNOLOGY

GROWSHIELD

With a decade of experience, we have profoundly understood and analyzed the growers' concerns and deployed the "GrowShield" technology which helps the crop to flourish and protect from external interferences. The technology focuses on minimizing the ionic constituents and protecting against weeds and pathogens which results in achieving a homogeneous and prolific root growth for maximum crop yields.

KOKOSFLORA COCO MATERIAL TYPES

Kokosflora provides a wide range of coco material types to fulfil the plant's growing requirements for increased yields.

Normal
(EC > 3.0)
Unwashed

Basic
(EC < 0.8)
Washed
