SIEVE STRUCTURES

We, KOKOSFLORA, offer wide range of combinations of coco peat, fibres and chips with the highest quality, designed for different stages of root & plant growth and various irrigation systems for medicinal cannabis cultivation. This way we achieve the most optimal moisture and aeration properties for the crops leading in maximum yield.

TYPES OF COCO MATERIAL

KOKOSFLORA provides wide range of coco material types to fulfil the plant's growing requirements for increased yields. Our Deluxe & Premium Coco material type comes with "**GrowShield Technology**" protection.

SCIENTIFICALLY DRIVEN

GROW SHIELD TECHNOLOGY

GROWSHIELD TECHNOLOGY PROTECTED

TECHNOLOGY
GROWSHIELD

With a decade of experience, we have profoundly understood and analyzed the growers' concerns and developed the "GrowShield" technology which helps the crop to thrive and protect from external interferences. The technology focuses on minimizing the ionic constituents and protecting against weeds and pathogens which results in achieving a homogenous and prolific root growth for maximum crop yields.

KOKOSFLORA CANNABI-MIX GROWCUBE

KOKOSFLORA CANNABI-MIX GROWCUBES are the best choice during the propagation stage of medical cannabis to avoid any transplant shocks. We offer wide range of customizable blends and sizes. It also comes with UV treated bags with customizable plant and drain holes.
